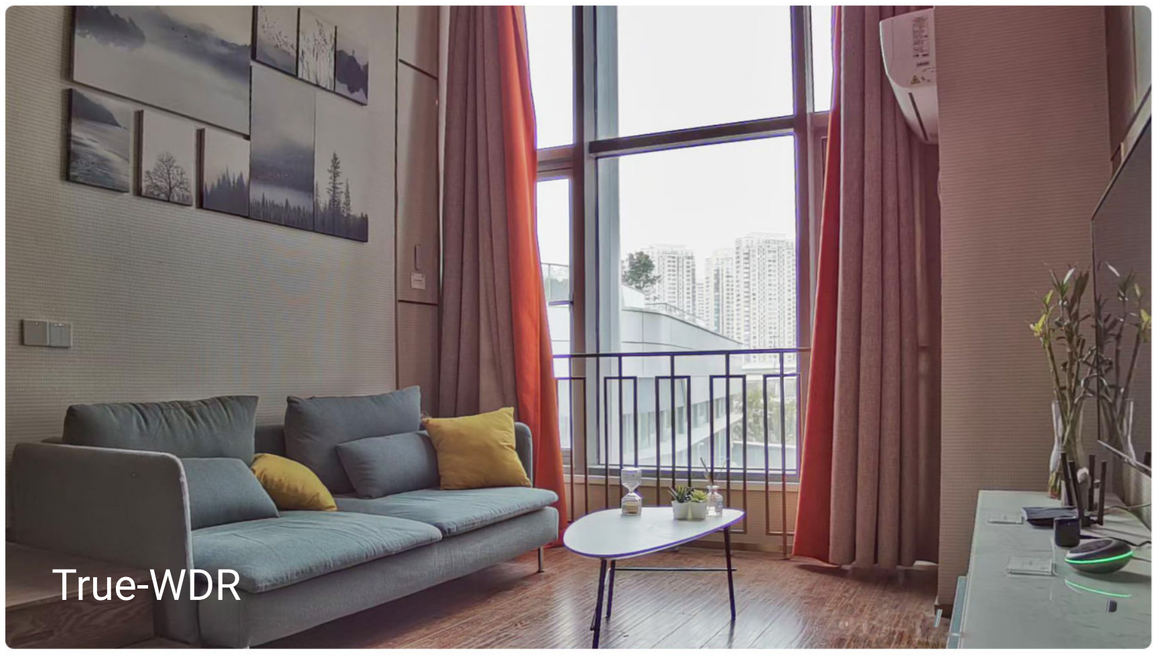
Smart Tracking

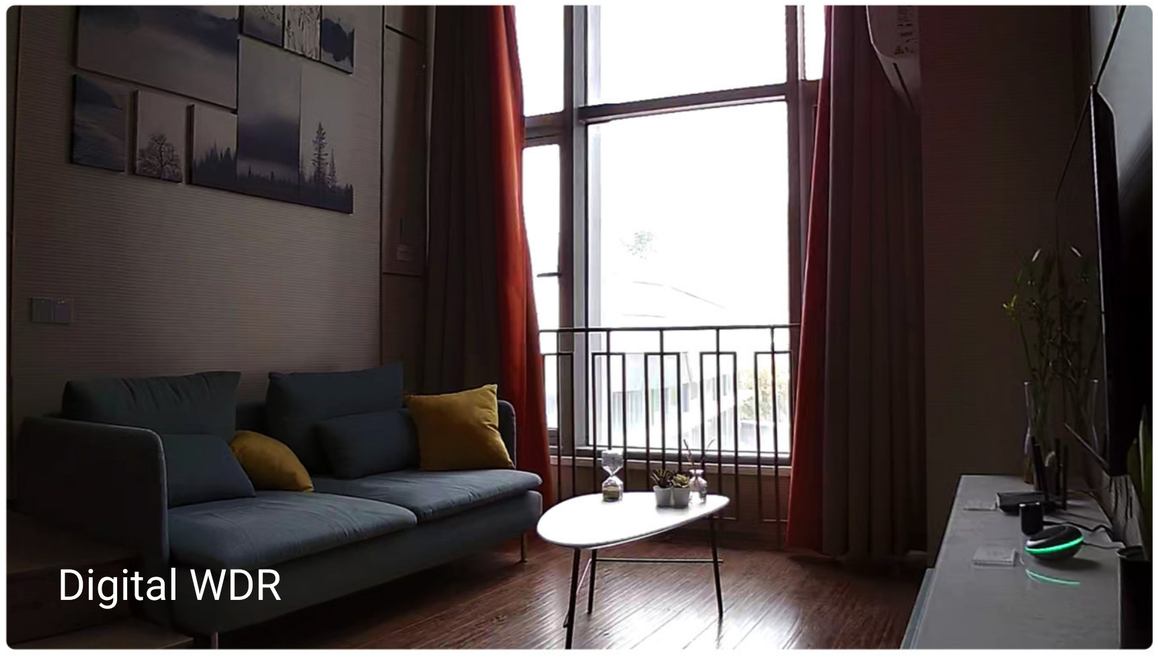
Get alerts when movement is detected.

We all want to receive the notifications that matter. Powered by an advanced AI chip with computing capability, the upgraded C6CN detects and tracks the contour of human bodies in real time.

True-WDR for truly clear images.

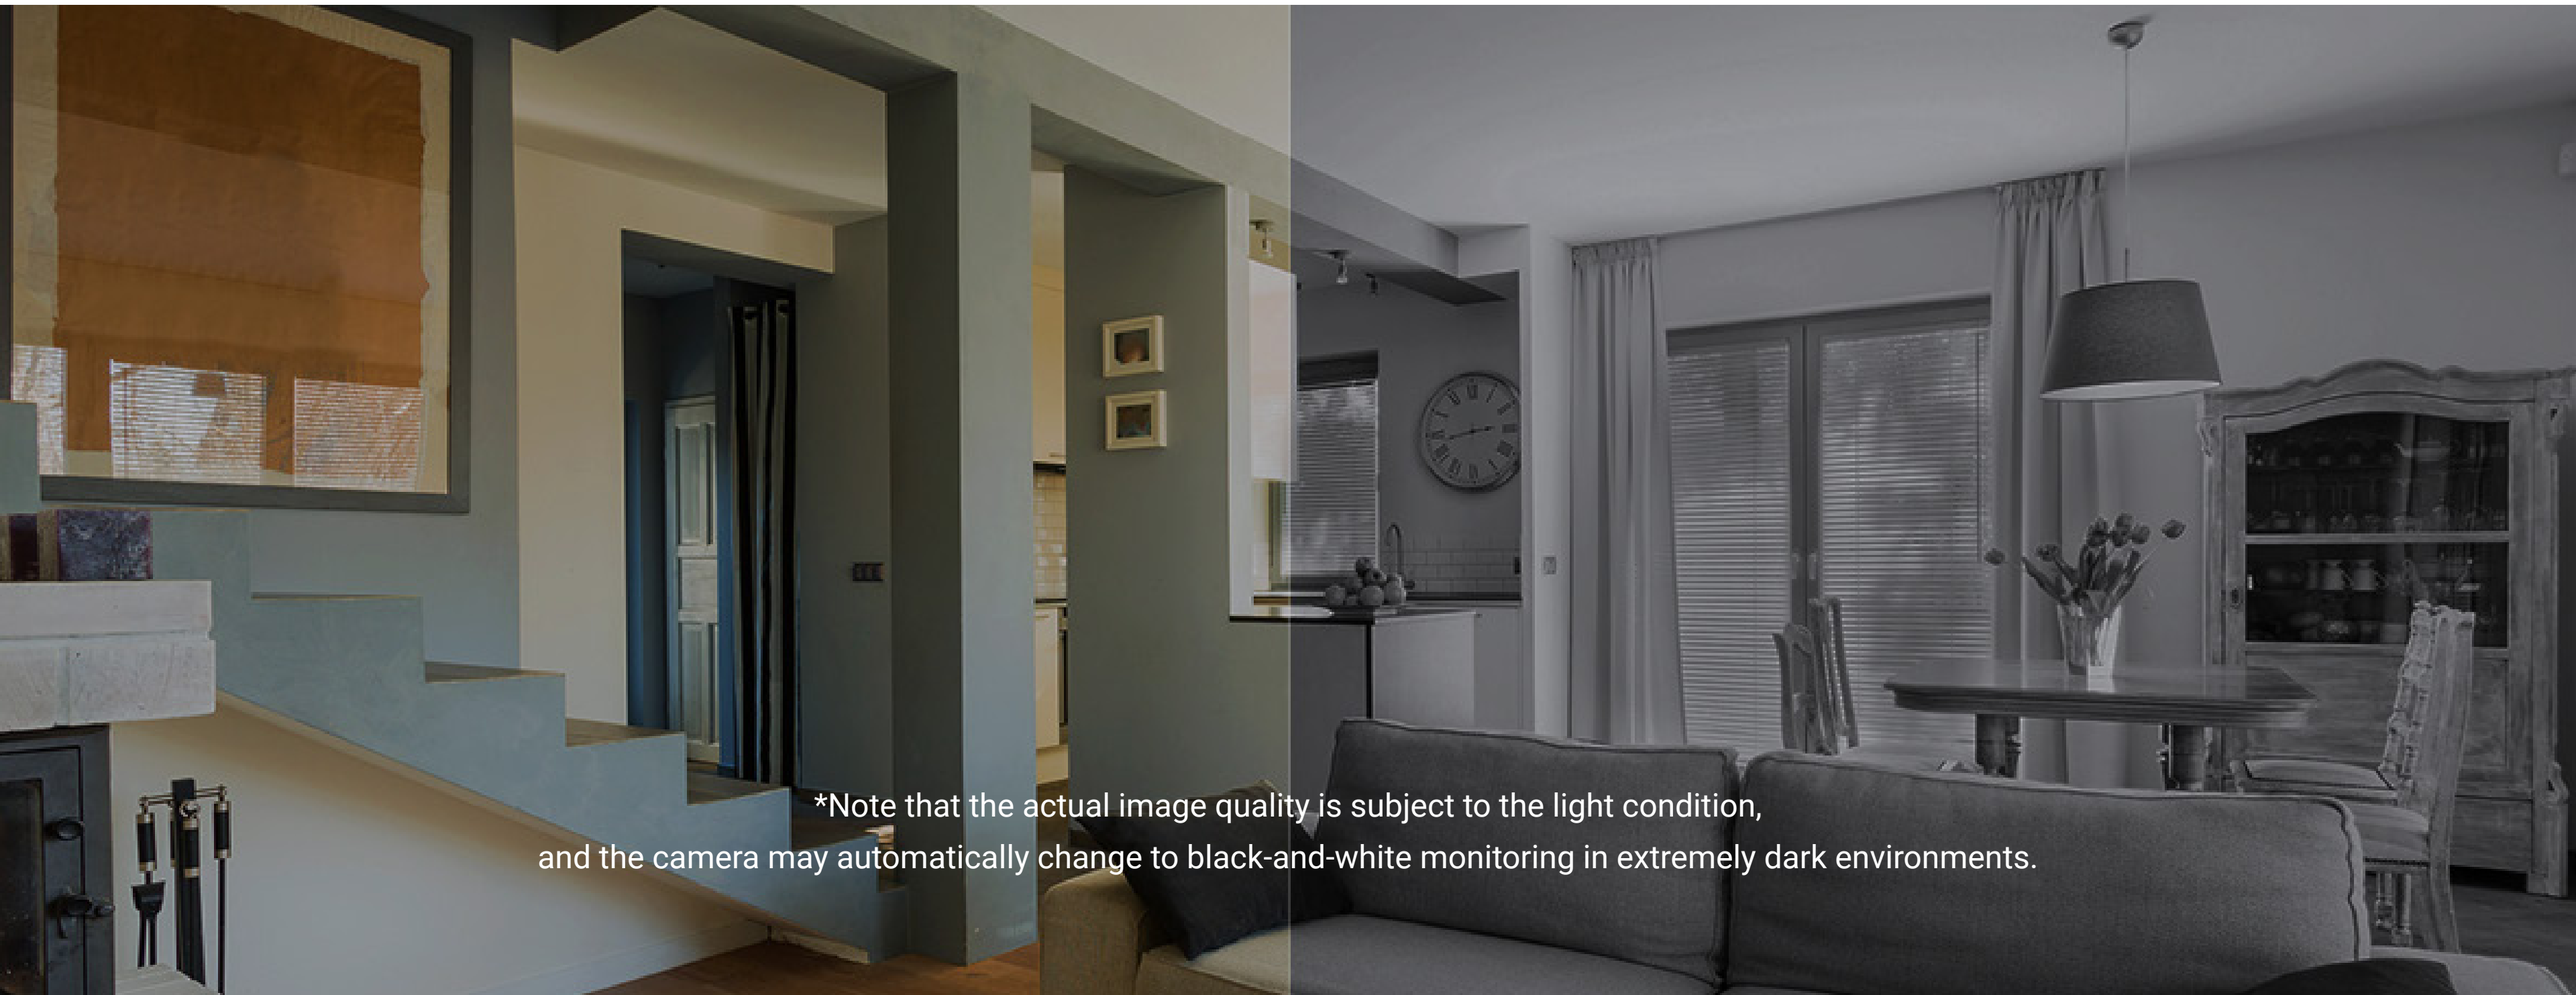
The new C6CN Camera uses sensor-based True-WDR technology to eliminate overexposure or underexposure in high-contrast scenes, delivering evenly-bright images from dawn to dusk.





Clearer vision despite the dim light.

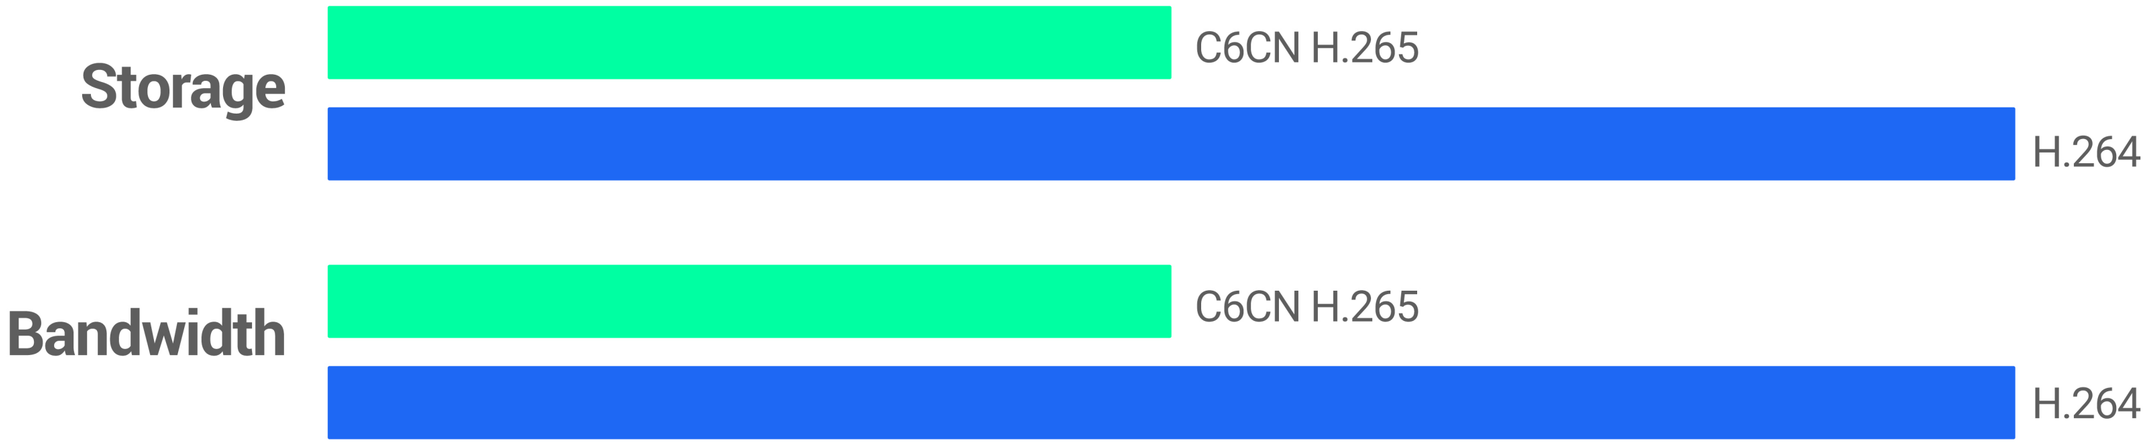
With its powerful starlight lens, the upgraded C6CN excels at image clarity and quality, enabling color vision* even in low light conditions where many other cameras may switch to black-and-white video. It is a must-have for reliable, 7/24 home protection.



*Note that the actual image quality is subject to the light condition,
and the camera may automatically change to black-and-white monitoring in extremely dark environments.

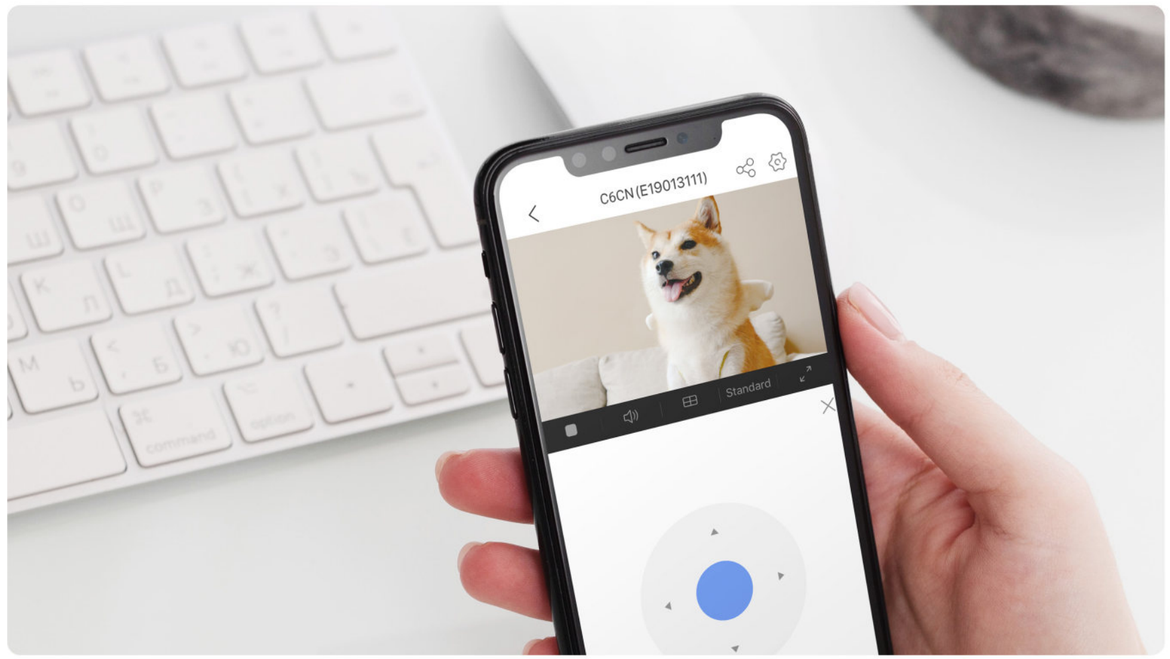
Save money on storage and bandwidth.

The camera features the advanced H.265 video compression technology, achieving better video quality with only half the bandwidth and half the storage space of the previous H.264 video compression standard.



Two-way conversations.

Use the EZVIZ App on your mobile device to call home when you are away. Enjoy the opportunity to have a conversation now that both sides can speak to each other as with a normal phone call.



We protect your data and privacy.

Protecting your data and privacy is our highest priority. Data transmission between the camera and the EZVIZ Cloud is encrypted from end to end. Only you have the keys to decrypt your data.
